BS Software Engineering

COMSATS University Islamabad, Lahore Campus.

EXPERIENCE

Pink Chicken

Mar 2025 - Present

- Unified Shopify (10+ retail + e-commerce) with Apparel Magic WMS; virtual warehouse logic
- Million records migrated daily with incremental and fullSync based timestamps so pipeline run is under 4hours
- Python scripts comparing NetSales/GrossSales of millions of dollars in Shopify dashboard and mySQL views
- Fast queries using composite Indexes, MultiStep procedures, Utility tables for 10's Millions of records
- Stack: Azure Data Factory, Azure SQL, Python, Dataflow

Palmetto Air Balance

Dec 2024 - Jun 2024

- Designed Azure-based warehouse: ADF pipelines, Integrated NetSuite, Air1, UKG; complex reconciliation
- Python scripts in databricks for netsuite data migration to StorageAccount and daily run
- Dynamic MERGE procedures, logging/monitoring, email alerts, failure categorization
- Delivered real-time dashboards (revenue, backlog, utilization) and snapshot architecture

Abundance Movement, Full Stack Developer

April 2023 - Present

- Managed the entire development lifecycle, from frontend and backend development to DevOps, ensuring all technical decisions aligned with the project's goals and requirements
- Used LLMs AI, Langchain, vector database and tokenize indexes for smart search, decreased LLM cost by 95%
- Implemented NestJS-based backend and database design/implementation.
- Integrated with ATM contract integration and TypeORM PostgreSQL, location based indexes.
- Python based Lambda function for images/video compression in AWS S3 Bucket using automated Triggers

Helpicon — Backend Developer

September 2023 - Present

- Integrated Swish/Stripe/Workoma in payment service, Twilio conversation and 90% cost reduction for twilio
- Api speed optimization by 2-3x under 800ms using necessary fields only, caches, indexes
- Worked on microservices deployed on AWS via jenkins pipelines over EKS cluster
- Developed Common Services for communication and optimizations for data transfer.

Frizhub, Lahore, Lahore — Full Stack Web Developer

November 2022 - August 2023

- Worked on NFT explorer application (CHAINSCAN) including data from Ethereum to PostgreSQL.
- Migrating millions of Ethereum contracts/tokens, Utilized Alchemy Graph API,
- Query Optimizations for millions of records in PostgreSQL
- Angular modules including Web3-based subscription, Auth using Web3.

P2G Global Services, Remote — Contract Developer

November 2020 - 2023

- Developed and optimized hundreds of thousands of products for the website.
- Implemented SEO-friendly features and segment with Google Analytics for user flow tracking.
- Created scripts for managing & updating 130k+ products, order shipment tracking with Didadi APIs, and maintained multiple payment methods and continuous inventory updates.

Certifications

AWS Certified Solutions Architect – Associate (2024)

[Verified via Credly](#)

HashiCorp Certified: Terraform Associate | 2024

[Verified via Credly](#)

TECHNICAL SOFTWARE SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, Node.js, React.js, Next.js, Angular, HTML5, CSS3, Sass, Python
- **Backend Technologies:** MongoDB, Nestjs, PostgreSQL, Strapi, AWS, Stripe, PayPal, Twilio, SendGrid
- **Tools & Platforms:** AWS, Azure, terraform, GitHub, Expo, Figma, Microservices, Alchemy, Graph API, Jira, LLMs, Langchain, Pinecone, Vector Database, ADF, Databricks, Azure,

LANGUAGES

Professional Proficiency: Node.js, TypeScript

PERSONAL PROJECTS

Employee & Resource Management System

- Developed a React-native app for small-scale business management, reducing paperwork and errors.
- Implemented multilingual support and a demo video: [Demo Video](#).

INTERESTS

Anime, DevOps, Cooking, Youtube, Cloud
